Notes to the Condensed Interim Consolidated Financial Statements

For the six months ended October 31, 2018

1. Nature and continuance of operations

ePower Metals Inc. (formerly Argus Metals Corp.) (the "Company") acquires, explores and develops interests in mineral projects. The Company's shares are traded on the TSX Venture Exchange ("TSXV" or the "Exchange"). In December 2017, the Company changed its name to ePower Metals Inc. The Company is engaged in mineral exploration with a focus on properties bearing cobalt, copper and other metals used to manufacture high-performance batteries.

The Company is incorporated under the laws of British Columbia. The head office and principal address of the Company is Suite 1507 – 1030 West Georgia Street, Vancouver, British Columbia, V6E 2Y3.

In November 2017, the Company reinstated a Barbados subsidiary, Argus Metals (BGI) Inc. which had lapsed, and incorporated ePower Metals under the laws of Suriname. In February 2018, the Company acquired a subsidiary in Mexico, ePower Metals SA de CV. These subsidiaries were substantially inactive through to October 31, 2018.

The business of exploring for and mining of minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations.

The Company has not generated revenue from operations. The Company recorded a loss of \$763,840 during the six months ended October 31, 2018 and, as of that date the Company's deficit was \$36,644,914. As the Company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. These material uncertainties cast significant doubt upon the Company's ability to continue as a going concern. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future. The Company had cash of \$319,839 at October 31, 2018 (April 30, 2018 - \$1,177,271). The Company expects however that it will undertake exploration and acquisitions that will require it to raise funds within 12 months.

2. Basis of preparation

The financial statements are presented in Canadian dollars, which is the functional currency of the Company.

Statement of Compliance

These condensed interim consolidated financial statements of the Company for the six months ended October 31, 2018 have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with IFRS as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), on a basis consistent with the significant accounting policies disclosed in note 3 of the most recent annual financial statements as at and for the year ended April 30, 2018 as filed on SEDAR at www.sedar.com. The condensed interim consolidated financial statements do not include all of the information required for full annual financial statements and were approved and authorized for issue by the audit committee on December 18, 2018.

ePower Metals Inc.

(formerly Argus Metals Corp.)

Notes to the Condensed Interim Consolidated Financial Statements

For the six months ended October 31, 2018

2. Basis of preparation (continued)

Basis of measurement

The financial statements have been prepared on a historical cost basis.

The financial information is presented in Canadian dollars, which is the functional currency of the Company.

Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Argus Metals (BGI) Inc., ePower Metalen, and ePower Metals SA de CV. All significant intercompany transactions and balances have been eliminated upon consolidation.

Foreign currency transactions

Foreign currency amounts are translated into each entity's functional currency as follows:

At the transaction date, each asset, liability, revenue and expense denominated in a foreign currency is translated into the entity's functional currency by the use of the exchange rate in effect at that date. At the year-end date, unsettled monetary assets and liabilities are translated into the functional currency by using the exchange rate in effect at the year-end date and the related translation differences are recognized in net income.

Exchange gains and losses arising on the retranslation of monetary available-for-sale financial assets are treated as a separate component of the change in fair value and recognized in profit or loss. Exchange gains and losses on non-monetary available-for-sale financial assets form part of the overall gain or loss recognized in respect of that financial instrument and are included in profit or loss.

Non-monetary assets and liabilities that are measured at historical cost are translated into the functional currency by using the exchange rate in effect at the date of the initial transaction and are not subsequently restated. Non-monetary assets and liabilities that are measured at fair value or a revalued amount are translated into the functional currency by using the exchange rate in effect at the date the value is determined and the related translation differences are recognized in profit or loss or other comprehensive loss consistent with where the gain or loss on the underlying non-monetary asset or liability has been recognized.

The functional currency of the Company and its subsidiaries is the Canadian dollar and these financial statements are presented in Canadian dollars.

Critical accounting estimates and judgements

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in total comprehensive loss in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

ePower Metals Inc.

(formerly Argus Metals Corp.)

Notes to the Condensed Interim Consolidated Financial Statements

For the six months ended October 31, 2018

2. Basis of preparation (continued)

Information about critical estimates in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements are discussed below:

Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after the expenditure is capitalized, information becomes available suggesting that the recovery of the expenditure is unlikely, the amount capitalized is written off in the profit or loss in the period the new information becomes available.

Rehabilitation Provisions

Rehabilitation provisions have been created based on the Company's internal estimates with future period amounts discounted to reflect the time value of money. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs which will reflect the market condition at the time the rehabilitation costs are actually incurred.

Income tax

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes it has adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company may recognize deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

Share-based payment transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 9.

(formerly Argus Metals Corp.)

Notes to the Condensed Interim Consolidated Financial Statements

For the six months ended October 31, 2018

3. New accounting pronouncements

IASB or the IFRS Interpretations Committee have issued certain pronouncements that are mandatory for accounting years beginning on or after May 1, 2018. None of these are expected to be relevant to the Company's financial statements, except for the following:

IFRS 9 Financial Instruments

IFRS 9 amends the requirements for classification and measurement of financial assets, impairment, and hedge accounting. IFRS 9 introduces an expected loss model of impairment and retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortized cost, fair value through profit or loss, and fair value through other comprehensive income. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. IFRS 9 will be effective for the fiscal year beginning May 1, 2018. The Company does not expect that the new standard will have a material effect on the Company's financial statements

IFRS 16 - Leases

IFRS 16 specifies how to recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring that lessees recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has an insignificant value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. IFRS 16 was issued in January 2016 and will be applicable to the Company's fiscal year beginning May 1, 2019, although early adoption is permitted. The Company has not yet assessed the impact of this standard.

5. Exploration and evaluation assets (continued)

Panther Creek – Idaho

In October 2017, the Company entered into a mineral property option agreement with Utah Mineral Resources, LLC (“UMR”) to earn up to a 100% interest in the Panther Creek cobalt project located in the Idaho cobalt belt. To earn an initial 50% interest in the property, the Company paid US\$25,000 (\$32,025) upon signing and, in December 2017, paid an additional US\$150,000 (\$193,875) in cash and issued 5,500,000 common shares with fair value of \$4,125,000.

With effect from October 22, 2018, the Company and UMR amended the terms of the option agreement to defer project milestones. As amended, to earn 100% interest in the property the Company must make additional payments and expenditures:

- a) paying an additional US\$150,000, in cash or shares at the Company’s option, and incurring at expenditures of least US\$75,000 on the property by October 23, 2019 (incurred);
- b) paying an additional US\$150,000, in cash or shares at the Company’s option, and incurring additional expenditures of at least US\$100,000 on the property by October 23, 2020;and
- c) incurring further additional expenditures of at least US\$200,000 on the property by October 23, 2021.

In addition, should the Company determine that proven and probable mineral resources, (as determined in compliance with NI 43-101), of at least 4,000,000 tonnes grading a minimum 0.25% cobalt, are contained within any portion of the property, on or before five years following the date of the agreement, the Company will issue to UMR an additional 2,000,000 shares.

Upon exercise of the option, UMR will retain and will be entitled to receive, a 2% NSR royalty on all product derived from the property.

9. Share-based compensation (continued)

In May 2017, the Company granted incentive stock options to directors, officers, employees and consultants of the Company to purchase an aggregate of 890,000 shares at a price of \$0.10 per share expiring May 5, 2020. Using the Black Scholes method the grant-date value of each option was \$0.06.

In December 2017, the Company granted incentive stock options to directors, officers, employees and consultants of the Company to purchase an aggregate of 2,225,000 shares at a price of \$0.68 per share expiring December 12, 2020. Options vested on grant except for 275,000 options issued to an investor relations provider that vest over a 12-month period ending in December 2018. Using the Black Scholes method, the grant-date value of each option was \$0.42.

In June 2018, the Company awarded options to directors and contractors to purchase up to 910,000 common shares at a price of \$0.20 per share expiring June 15, 2020. Using the Black Scholes method the grant-date value of each option was \$0.13.

In September 2018, the Company awarded options to an officer to purchase up to 40,000 common shares at a price of \$0.21 per share expiring September 18, 2020. Using the Black Scholes method the grant-date value of each option was \$0.13.

Share-based compensation expense to be recognized in the six months ended October 31, 2018 was \$156,400 (2017 - \$55,000).

The Company used the Black-Scholes option pricing model to estimate the fair value of the options granted using the following weighted average assumptions:

	<u>2018</u>	<u>2017</u>
Risk-free interest rate	2.02%	1.33%
Dividend yield	0.00%	0.00%
Expected volatility	108%	79%
Expected option life	2 years	2 years

10. Loss per share

The calculation of the basic and diluted loss per share for the six months ended October 31, 2018 and 2017 presented is based on the following data:

	Three Months Ended October 31,		Six Months Ended October 31,	
	2018	2017	2018	2017
Loss for the period	(\$323,543)	(\$31,361)	(\$763,840)	(\$97,898)
Weighted average number of common shares outstanding	33,980,923	11,977,548	33,965,706	10,918,514
Loss per share, basic and fully diluted	(\$0.01)	(\$0.00)	(\$0.02)	(\$0.01)

Diluted loss per share for the six months ended October 31, 2018 and 2017 is the same as basic loss per share as the exercise of the 2,481,250 options (October 31, 2017 – 890,000) and 8,467,825 warrants (October 31, 2017 – 1,007,500) would be anti-dilutive.
